## BIOGRAPHY

**Client Name** is an EPA Universal Certified and an Industrial Electrician Certified who offers more than 25 years of remarkable success in mechanical and electrical systems maintenance. With an established career within the real estate industry and military setting, he has displayed tenacity in leading and completing HVAC, electrical, and plumbing projects for large commercial and residential complexes and infrastructure developments and utilities.

Client exemplifies his determination to take full ownership of a project from conception to completion. He is a master of developing methods and specifications, with a strong work ethic in observing the best practices in systems maintenance operations and applicable regulatory standards. Armed with an out-of-the-box approach to solving problems, he acts as a champion in facility upgrades, renovations, and buildouts, as well as in equipment and systems inspection, testing, and maintenance.

As of present, Client works as the chief engineer for a 407,000-square-foot building at ABC Properties. In this role, he has moved several major projects to completion with zero incidents. These included four construction projects, a complete elevator modification, rooftop replacement, building automation system upgrade, lighting control system upgrade, lightning and surge protection system upgrade, and a complete exterior lighting upgrade to LED. His professionalism in delivering quality workmanship and the highest level of customer service speaks of his unparalleled commitment to go above and beyond for both clients and the organization. To note, he successfully increased building efficiency while minimizing the company's monthly energy cost from \$85K to approximately \$27K to \$37K.

With an ability to easily adapt to diverse environments and cultures, Client is effective at building harmonious relationships as well as contributing to the continuous growth of every organization he works for—from a US Army Camp in Kuwait to an NGBS Green PRO Designation-recipient company. As such, Client has influenced business outcomes through his leadership, industry expertise, and positive relationships with others.

Client received his diploma in Building Facility Maintenance Technology and Refrigeration Technology at ABC Tech College. He currently resides in Acworth, Georgia.
